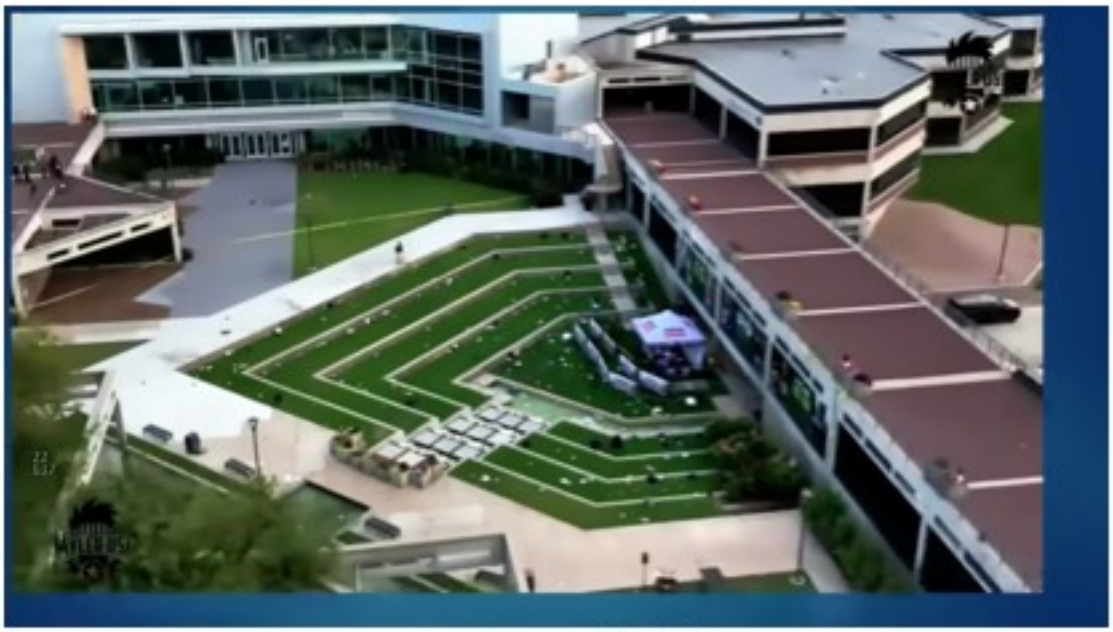
TWO DIFFERENT DIRECTIONS THE BULLET COULD THAT KILLED CHARLIE KIRK COULD HAVE COME FROM



From Roof Top Behind the Trees

Analysis Solves Kirk Case—Evidence Points Away From Robinson's Position
Best Guess, This Area Should Be Scoured Carefully For Clues

Look at the Black Dot on the left above the trees where a shooter could have made an easier shot with a different rifle.

We now know that there were several men on these rooftops that were photographed wearing black cloths with back hats.

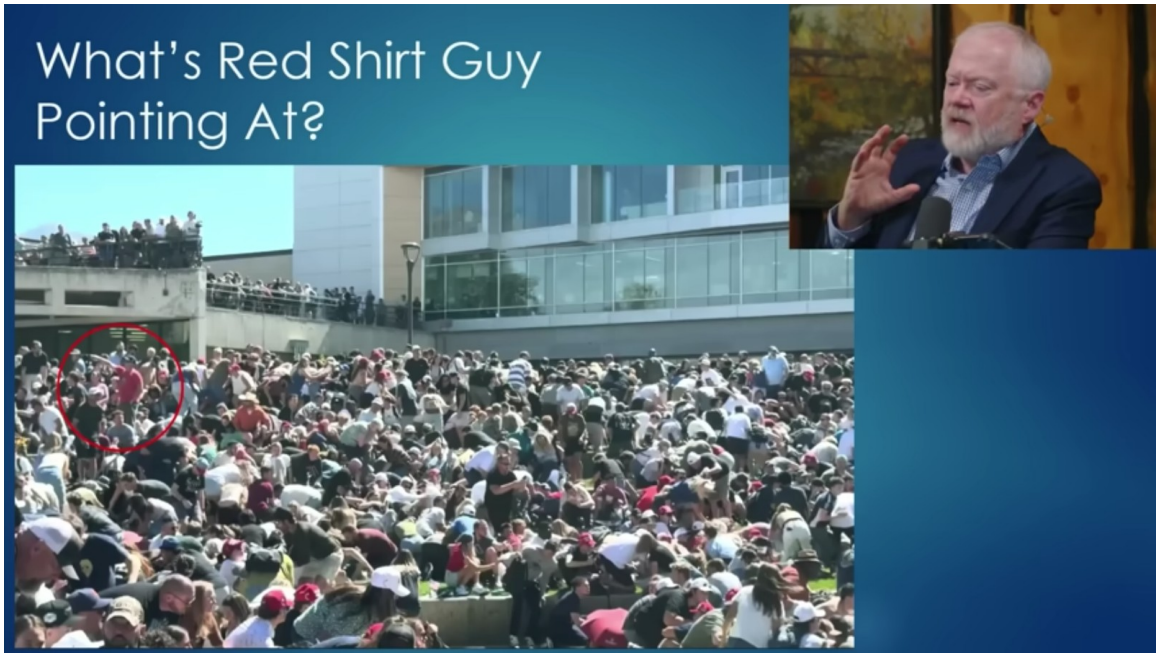
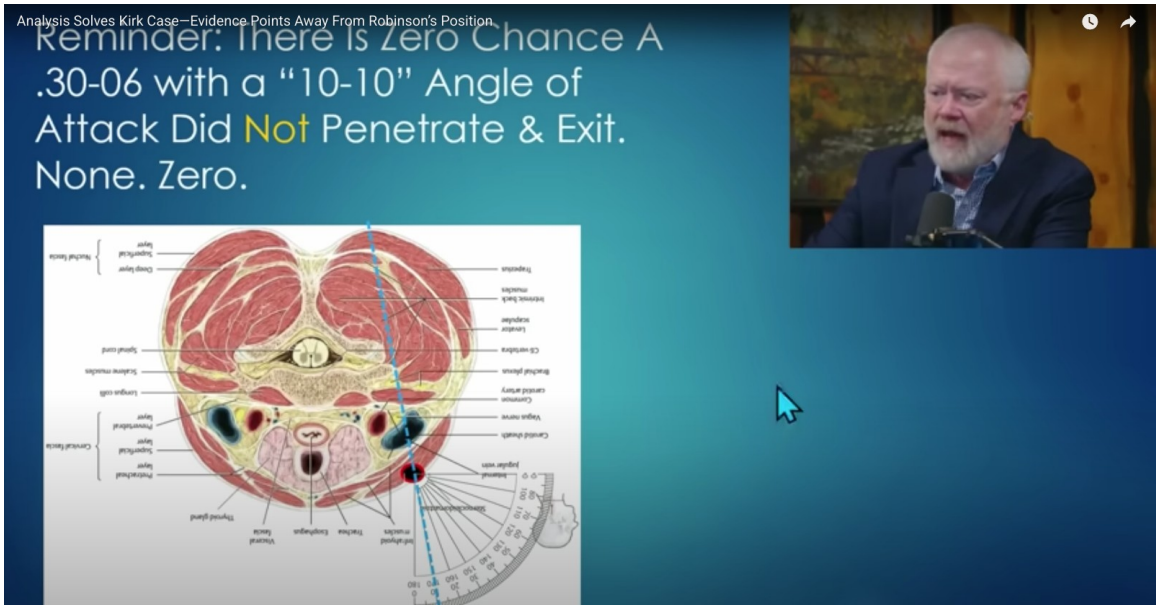
Shooting Positions That
Match The Physics
What's Red Shirt
Guy Pointing At?
And Cowboy Hat? What's
He Looking At?



Here is another excellent video from Peak Prosperity with yet more details that show where the real shot may have come from that killed Charlie Kirk.

Peak Prosperity goes into more detail of what the bullet did to Charlie's body as it entered and that from this new location the bullet seemed to explode inside Charlie's neck and then headed down into his neck and then upper chest area.

EVERYBODY AGREES THAT



Analysis Solves Kirk Case—Evidence Points Away From Robinson's Position
Reminder: There is Zero Chance A .30-06 with a "10-10" Angle of Attack Did Not Penetrate & Exit. None. Zero.

Kyle Robinson and the alleged German rifle DID NOT KILL CHARLIE. That a 30.06 was **NOT** the bullet that hit Charlie Kirk PERIOD!!!!!! That a smaller bullet was used, which sounds like an exploding bullet to me?

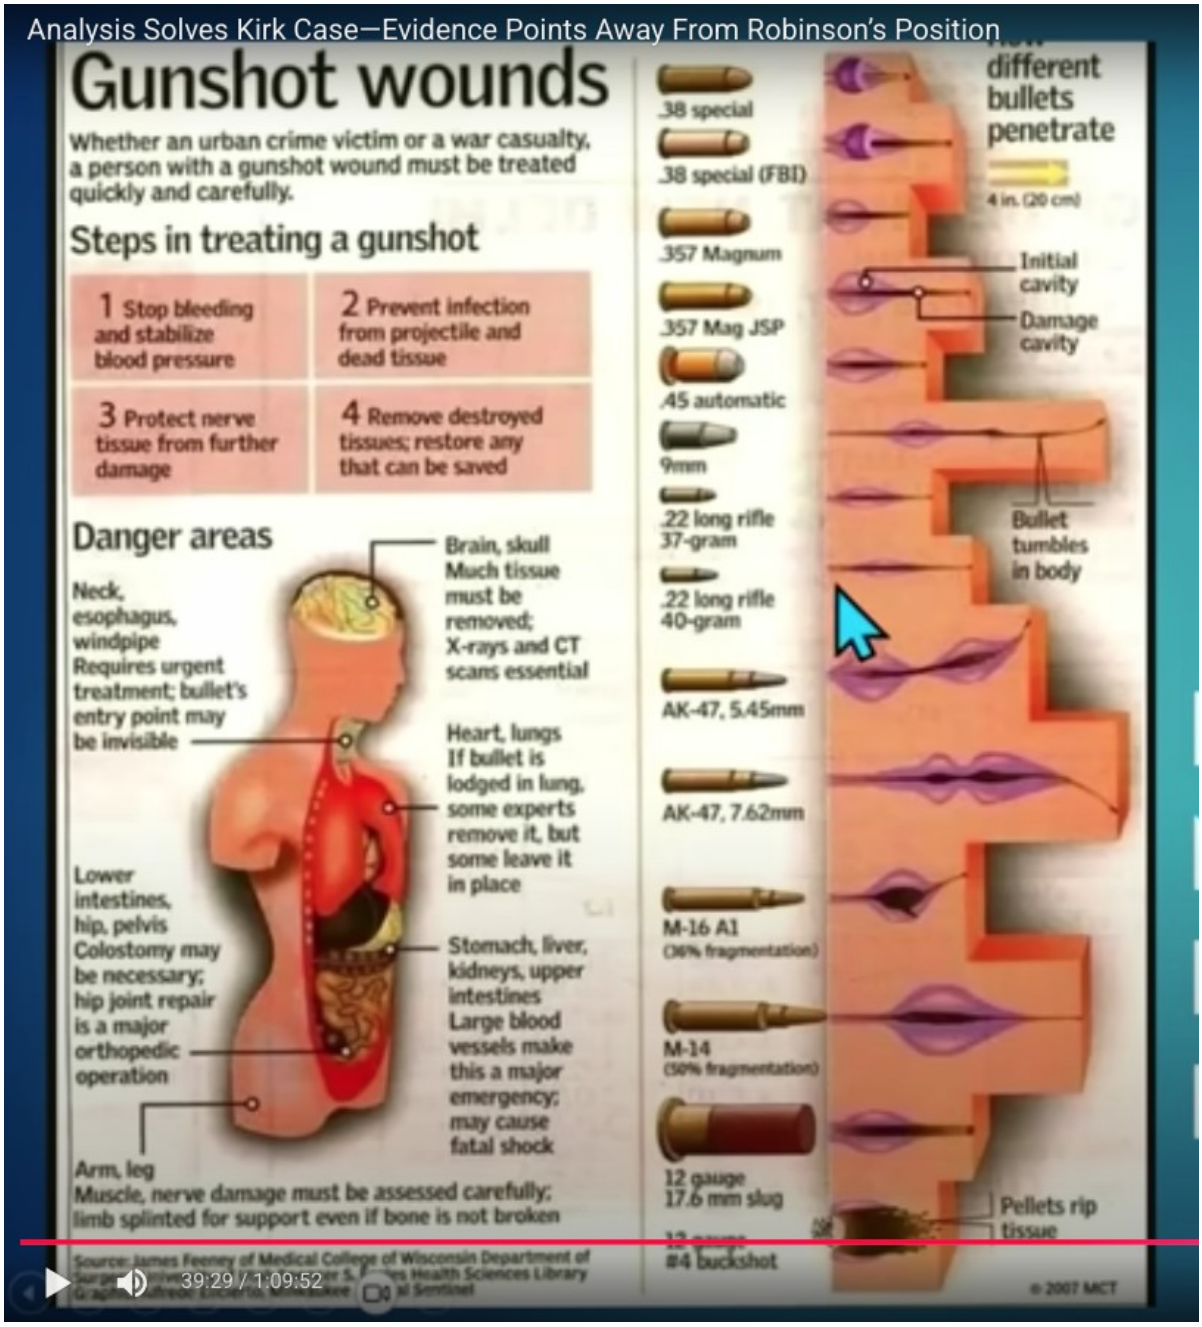
That the FBI is with holding the bullet is a real problem

That no autopsy was done (what's new) is a real problem

The Crime Scene should never have been taken down so that investigations could take place. It looks like the rush to claim Kyle Robinson the killer was justification to take down the crime scene and make changes that are not reversible. Everyone is complaining about this.

The echo sound is not good. When I hear the sound it seems like more shots were fired which may be because of how the sound rick shays a round.

VARIOUS BULLETS BEING DISCUSSED



Analysis Solves Kirk Case—Evidence Points Away From Robinson's Position
Gunshot wounds
Whether an urban crime victim or a war casualty, a person with a gunshot wound must be treated quickly and carefully.
Steps in treating a gunshot
1 Stop bleeding and stabilize blood pressure
2 Prevent infection from projectile and dead tissue
3 Protect nerve tissue from further damage
4 Remove destroyed tissues; restore any that can be saved
Danger areas
Neck, esophagus, windpipe Requires urgent treatment; bullet's entry point may be invisible
Brain, skull Much tissue must be removed; X-rays and CT scans essential
Heart, lungs If bullet is lodged in lung, some experts remove it, but some leave it in place
Lower intestines, hip, pelvis Colostomy may be necessary; hip joint repair is a major orthopedic operation
Stomach, liver, kidneys, upper intestines Large blood vessels make this a major emergency; may cause fatal shock
Arm, leg Muscle, nerve damage must be assessed carefully; limb splinted for support even if bone is not broken

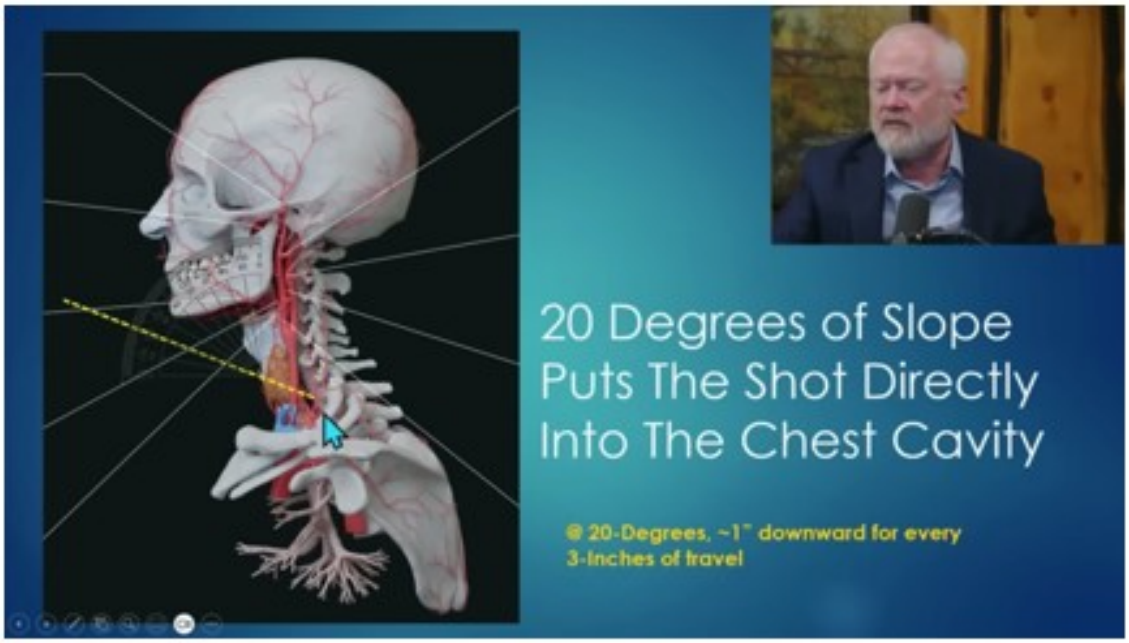
Various Bullet Piercing Abilities

TWO DIFFERENT OPINIONS ABOUT THE HOLE IN CHARLIE'S NECK

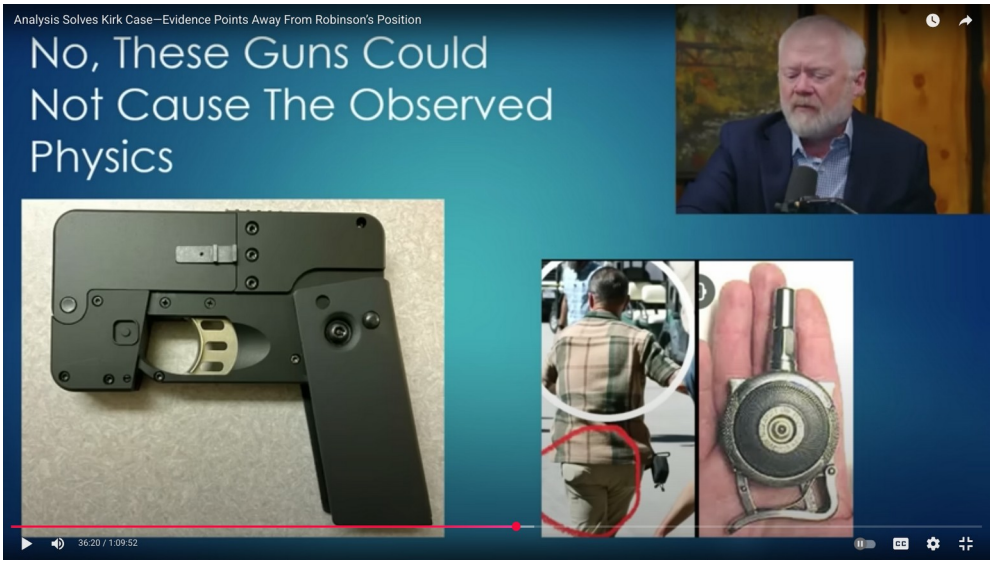


This second theory from Peak Prosperities claims the hole in Charlie's neck is an entrance wound that came from the front left of Charlie as is described in this video which really makes sense to me also.

Where the earlier video I sent two days ago indicated that the hole in Charlie's neck is an exit wound that came from a shot that hit the back right side of Charlie's hair line and existed at the hole in Charlie's neck.

This video from Peak Prosperity is a really good video because of how he explains what happened and the images he is using. Let me know what you think, O.K. Both of these theories have legs.

IF WE KNEW WHAT KIND OF BULLET HIT CHARLIES NECK WE WOULD BE ABLE TO DESCRIBE THE TYPE OF GUN USED OR NOT USED



Analysis Solves Kirk Case—Evidence Points Away From Robinson's Position
No, These Guns Could Not Cause The Observed Physics
36:20 / 1:09:52

GUNS THAT DID NOT SHOOT CHARLIE

The bullets from these smaller type of guns are not the guns used on Charlie.

NO BODY ARMOR ON CHARLIE

Ericka and Others said Charlie was not wearing body armor

All cover the nipples where Charles nipples are showing under his tee shirt and their is nothing under the back of his tee shirt that I can see?

🔥 DAN BONGINO BOMBSHELL: SHOCKING FBI ALLEGES CROWD May Have Been Involved Charlie Kirk TRUMP DETAIL

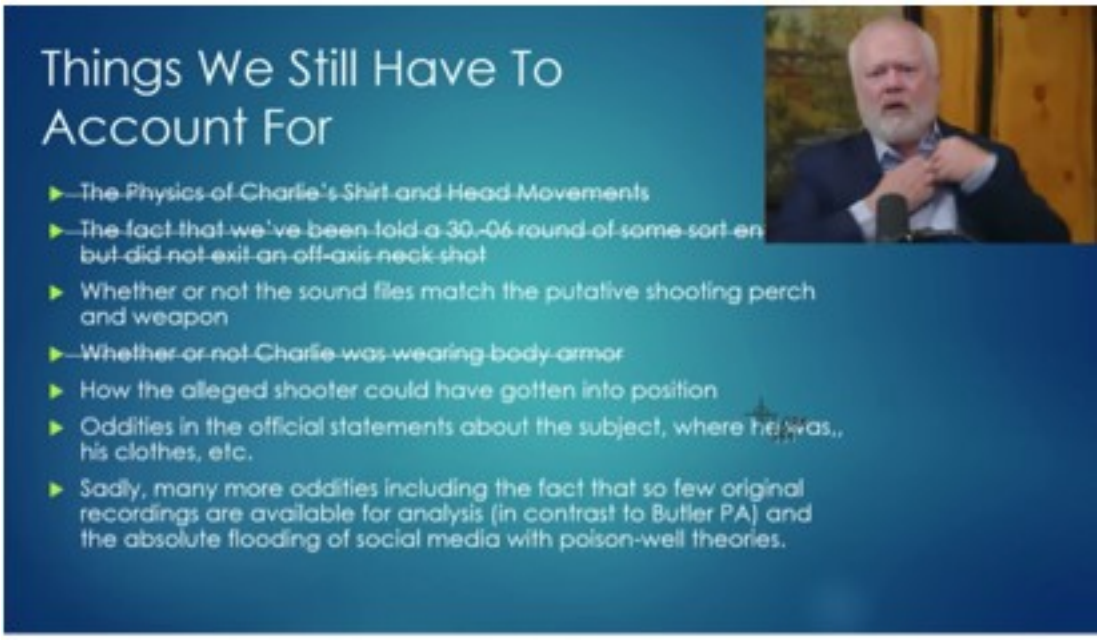
Lets just say something big will happen tomorrow

LIST OF THINGS YET TO DO



Things We Still Have To Account For
The Physics of Charlie's Shirt and Head Movements
The fact that we've been told a 30-06 round of some sort en but did not exit an off-axis neck shot
Whether or not the sound files match the putative shooting perch and weapon
Whether or not Charlie was wearing body armor
How the alleged shooter could have gotten into position
Oddities in the official statements about the subject, where he was,, his clothes, etc.
Sadly, many more oddities including the fact that so few original recordings are available for analysis (in contrast to Butler PA) and the absolute flooding of social media with poison-well theories.

CONCLUSIONS SO FAR

Conclusions
The observed overpressure event in Charlie's neck and upper torso is consistent with a high-velocity rifle round entering his neck and then torso and expending its considerable energy there. High confidence.
The chance that a .30-06 round fired from Tyler Robinson's alleged perch did not penetrate and exit the back of Kirk's neck is extremely low. As in impossibly low. High confidence.
Therefore, the actual shot must have come from some other elevated location to Kirk's left. Medium confidence. (for high confidence, need to know precisely which round was used and have access to autopsy report & X-rays.)
No small pistols of any sort could replicate the observed effects. High confidence.
No exploding mic/pager. High confidence.
The released footage of Tyler Robinson climbing down off the roof was manipulated. Medium confidence.

CONCLUSIONS SO FAR
